

Electrical – Drafter I

Pittsburgh, Pennsylvania Office

This full-time, drafting position requires a high school graduate or equivalent certification of education, and a graduate from a recognized technical institution program. The candidate must be proficient in verbal and written communications and dedicated to growing his/her career in the field. Must have the ability to work well with engineers, designer, and other draftspersons in a team environment, but also have the ability to effectively manage a single task unsupervised. Knowledge to evaluate, select, and apply basic drafting skills and techniques with general guidance from superiors, and you may be asked to work on several projects concurrently. Experience in a similar role as part of a work study, internship, or similar employment environment is favorable.

REQUIREMENTS:

Experienced draftsperson able to perform non-routine and complex drafting assignments that require the application of standardized drawing techniques. Works more independently with occasional advice from supervisor and may be also be considered as an entry level designer. A strong knowledge of 3D drafting is required.

A reasonable level of proficiency is expected with the following software:

- MS Office (i.e., Excel, Word, Outlook, PowerPoint)
- AutoCAD (or other CAD programs)
- 3D Modeling (as noted)

Applicant must be willing and able to learn and apply new drafting methods, techniques, and software as they become available.
